

Medical Preferred Drug List

Medicare Part B Step Therapy

The CVS Caremark® Medical Preferred Drug List encourages utilization of clinically appropriate and lower net cost products within the following therapeutic drug classes. The CVS Caremark Medical Preferred Drug List applies to the listed products only and any other product may be available under a plan’s medical benefit.

The listed preferred products must be used first. An exception process is in place for specific circumstances that may warrant a need for a non-preferred product. For example, this step therapy requirement does not apply to plan’s members who are actively receiving treatment (i.e., members with a paid claim within the past 365 days) with non-preferred product on the CVS Caremark Medical Preferred Drug List.

Drug Class	Non-Preferred Product(s)*	Preferred Product(s)
<i>Alpha-1 Antitrypsin Deficiency</i>	Aralast Glassia Zemaira	Prolastin-C
<i>Autoimmune Infused Infliximab</i>	Avsola Renflexis	Inflectra Infliximab Remicade
<i>Autoimmune Infused/Other</i>	Actemra Cimzia llumya Orencia Stelara	Entyvio Simponi Aria

*Non-preferred product(s) are only available if process exception criteria are met.

This list indicates the common uses for which the drug is prescribed. Some medicines are prescribed for more than one condition. This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers not affiliated with CVS Caremark. Listed products are for informational purposes only and are not intended to replace the clinical judgment of the prescriber. Listed therapeutic classes and specific drug preferred designations are subject to change based on new drug launches, product approvals, drug withdrawals and other market changes.
